Pull Score Analysis

Angelika Stefan

2026-11-01

In the following, we present exploratory analyses of pull scores. We did not specify how we would analyze pull scores in the Stage 1 report, so, here, we present descriptive statistics and predict pull scores from ideology.

There are six different pull scores:

- FAV on MJP
- MJP on FAV
- MD on Profit
- Profit on MD
- FAV on P
- P on FAV
